Overview

WhatsApp Status lets you share temporary updates with your contacts. Post text, photos, videos, music, voice messages, or AI-generated images. You can see who viewed each of your statuses.

Use status to share daily moments, express yourself, or stay connected. This guide teaches you to add statuses on mobile and desktop devices. Follow the steps below to choose your status type and platform.

Key Features:

- Temporary updates (24-hour visibility)
- Multiple media types (text, photos, videos, music, voice, AI images)
- Privacy controls for who can view

- View tracking for your statuses
- Cross-platform support (mobile and desktop)

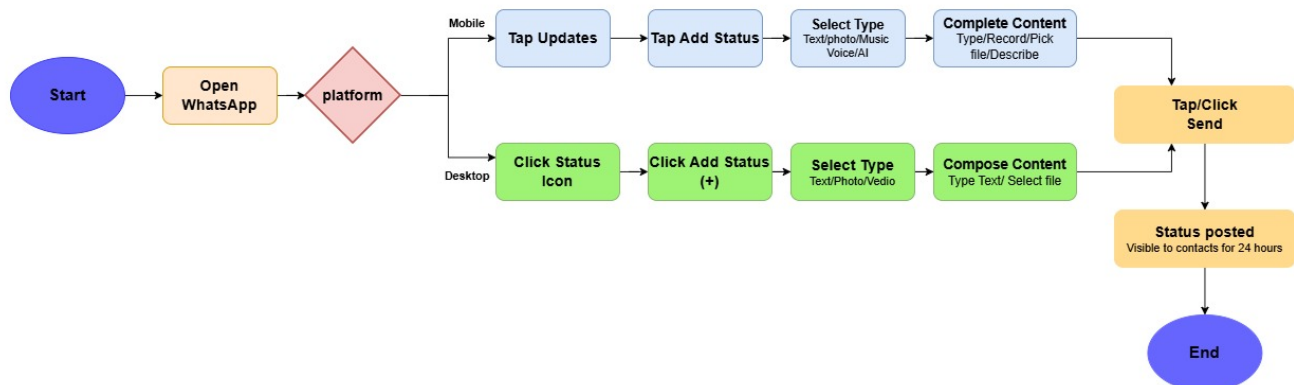

When to Use:

- Share daily moments or quick updates
- Express creativity with media or AI-generated content
- Stay connected without formal messaging
- Broadcast temporary information like events or availability

Limitations:

- Music, Voice, and AI Image statuses are mobile-only
- Desktop supports Text and Photos & Videos only
- Feature availability may vary by region (e.g., Meta AI in select countries)

The following diagram shows the end-to-end workflow for adding a WhatsApp Status update.

Audience: This guide is for new WhatsApp users, multitaskers managing status across devices, and privacy-conscious users wanting to control visibility.

Prerequisites

Ensure you meet the following requirements before you add a status update:

- Update WhatsApp to the latest version on your device.
- Log in to your WhatsApp account with a verified phone number.
- Ensure your device has an internet connection.

- Enable WhatsApp microphone permission on your device (required for Voice status only).

Feature Availability Note: Some features like Music, Voice, and AI Images may not be available in all regions. Check WhatsApp settings or app store for updates. Meta AI availability varies by country.

Update Your WhatsApp Status on Mobile

To add a WhatsApp status update on mobile,

1. On your Android device, open **WhatsApp**.
 2. On the WhatsApp home screen, tap the **Updates** tab.
 3. On the **Updates** screen, tap **Add status**.
 4. On the **Add status** screen, select one of the following status types:
-

Text Status

To add a text status,

- a. Tap **Text**.
- b. In the **Type a status** field, type your message.

 **Note:** Tap **Aa** to change font style, or tap the color palette to change background color.

Photos & Videos Status

To add a photo or video status,

- a. Tap **Photos & Videos**.
- b. From your device gallery, select a photo or video.
- c. In the caption field, type a caption. *(Optional)*

 **Note:** Max duration: 90 seconds.

Music Status

To add a music status,

- Tap **Music**.
 - In the **Search moods** search bar, search for a track. Alternatively, browse the **Suggested**, **Mood**, or **Genre** tabs.
 - Select the track you want to share.
-

Voice Status

To add a voice status,

- Tap **Voice**.
- Press and hold the **microphone** button to record your message.
- Release the **microphone** button to stop recording.

 **Note:** Enable microphone permission: **Settings** > **Apps** > **WhatsApp** > **Permissions** > **Microphone**.

AI Image Status

To add an AI image status,

- Tap **AI images**.
- In the **Describe an image** field, type a description of the image that you want to generate.
- From the generated results displayed on the screen, select an image.
- Optionally, edit with stickers or effects before posting.

Tap **Send** to post your status.

Quick Command Path (Android): WhatsApp > Updates tab > Add status > Select type > Customize > Send

Update Your WhatsApp Status on Desktop

On desktop, WhatsApp Web and the WhatsApp Desktop app support Text and Photos & Videos status updates. Music, Voice, and AI Image statuses are available on mobile only.

To add a WhatsApp status update on desktop,

1. Open **WhatsApp Web** in your browser, or open the **WhatsApp Desktop** app on your computer.
2. In the left panel, click the **Status** tab.  Desktop Status Tab
3. On the **Status** screen, click **Add status (+)**.
4. On the **Add status** screen, select one of the following status types:

Text Status

To add a text status,

- a. Click **Text**.
- b. In the text field, type your message.

 **Note:** Use the formatting toolbar to change font style or background color.

Tap **Send** to post your status.

Photos & Videos Status

To add a photo or video status,

- a. Click **Photos & Videos**.
- b. In the file browser, navigate to and select a photo or video file from your computer.
- c. In the caption field, type a caption. *(Optional)*

Tap **Send** to post your status.

Quick Command Path (Desktop): WhatsApp Web/Desktop > Status tab > Add status (+) > Select type > Customize > Send

Frequently Asked Questions

Q1. Can I add multiple status updates at once?

Ans. Yes. Contacts see all active statuses as a sequence in the order you post them.

Q2. Can I control who sees my status?

Ans. Yes. Go to **Settings** > **Account** > **Privacy** > **Status** to set visibility options.

Q3. Can I delete a status before it expires?

Ans. Yes. On the **Updates** tab, hold your status, then tap **Delete**. Deleted statuses cannot be recovered.

Q4. Can I save a status before it expires?

Ans. Yes. On the **Updates** tab, open your status and tap the **Download** icon to save it to your device gallery.

Troubleshooting

The following table describes common WhatsApp Status issues and how to resolve them.

Issue	Cause	Solution
Add status option does not appear on the Updates tab	WhatsApp needs an update or the feature is unavailable in your region	Update WhatsApp. If issue persists, contact WhatsApp Support.

Issue	Cause	Solution
Status posts but contacts cannot see it	Privacy settings exclude the contact, or the contact uses an older WhatsApp version	Go to Settings > Privacy > Status to confirm access. Ask contact to update WhatsApp.
Music option does not appear on the Add status screen	The Music feature is not yet available in your region	Update WhatsApp. Music availability varies by region.
AI images option does not appear	Meta AI is not yet available in your region, or your WhatsApp version requires an update	Update WhatsApp. Meta AI availability varies by region.
Voice status has no sound on playback	Microphone permission was not enabled during recording	Go to Settings > Apps > WhatsApp > Permissions > Microphone and enable permission. Re-record the voice status.
Status does not post — shows an error	Unstable internet connection	Connect to a stable Wi-Fi network or improve mobile data signal strength, then retry.

For issues not listed above (general troubleshooting):

- Check app permissions: [WhatsApp permissions \(Android/iOS\)](#).
- Clear WhatsApp cache (Android): [WhatsApp cache cleanup](#).
- Reinstall app: [Install or reinstall WhatsApp](#).

Best Practices

- Keep text status messages short and clear.

- Enable Do Not Disturb before recording a voice status.
 - Use specific descriptions for AI images to get more accurate results.
 - Experiment with different status types to engage your contacts.
 - Review your status after posting to ensure it displays correctly.
