Snagit

Camtasia

### Technical

Core Java

Oracle SQL

## EDUCATION

MCA

Jun 2013

Anjalai Ammal Mahalingam Engineering  
College

## SUMMARY

Certified API Technical Writer with around 3 years of combined software development and documentation experience. Expert at documenting RESTful APIs using Postman and Swagger/OpenAPI. Skilled in topic-based authoring (DITA), Minimalism, and MSTP, with a background at Kriyatec IT Systems executing back-end development and technical documentation workflows. Proficient with AI-assisted documentation workflows.

## CERTIFICATIONS & CORE FUNCTIONS

• **Fundamentals of API Documentation** – Tech Writer's Tribe

• **Technical Writing Certification (IT Industry)** – Tech Writer's Tribe

- Expertise in converting unstructured developer notes, database tables, and raw workflows into formal, user-friendly documentation to support cross-functional alignment.
- Deep competency in analyzing technical specifications to map endpoints, query parameters, request payloads, response schemas, and error codes.
- Skilled in applying Microsoft Manual of Style (MSTP) standards to ensure active voice, grammatical precision, and technical clarity for developer audiences.
- Proficient in executing end-to-end API behavioral testing and validation using Postman and Swagger to guarantee documentation accuracy.
- Strong foundation in back-end logic (Core Java) and data schemas (Oracle SQL) to naturally bridge the gap between technical infrastructure and engineering references.
- Adept contributor within Agile/Scrum lifecycles, participating actively in sprint planning, requirement breakdowns, and defect tracking.

## PROJECTS & ACCOMPLISHMENTS

### REST API Reference Guide — SWAPI (Star Wars API)

*Role: API Technical Writer | Tools: Postman, Swagger, Markdown, MS Word*

- Documented `/people/` and `/people/:id/` endpoints including request parameters, response schemas, and error codes.
- Validated all API behavior end-to-end using Postman to ensure absolute documentation accuracy.
- Applied active voice, MSTP standards, and OpenAPI-compatible formatting tailored for developer audiences.
- Structured content for seamless Swagger/OpenAPI integration and single-source content reuse.

## AWARDS

---

- Best In-House Trainee

## Capstone Project — User Documentation for Messaging Application

*Role: Technical Writer | Application: WhatsApp (Community platform) |  
Tools: MS Word*

- Designed and structured thorough task-based documentation utilizing topic-based authoring principles.
- Created comprehensive Quick Start Guides and User Guides by thoroughly testing application workflows across mobile and web platforms.
- Conducted structured Subject Matter Expert (SME) interviews to extract specific functional and user requirements.
- Applied MSTP standards to establish absolute visual consistency and efficient user navigation paths.
